How it Works:

There are various price options available for each product, we designed it this way to give you maximum flexibility depending on your budget and expectations.

Cabinet Sizes

All measurements are actual carcass size. Doors, drawer fronts and feet are not included in the measurement. Floor cabinets include feet which are adjustable from 130-160mm.

Custom Cabinet Widths

All cabinets are made to the exact width you require, we have separated the pricing into width ranges, for ease of quoting.

Custom Cabinet Heights

Selected appliance and pantry units can be made to custom heights if required.

Cabinet Depths

All cabinets are fixed depths. If required we can custom make to your specifications POA.

PRICE CATEGORIES EXPLAINED:

Carcass only

Should you wish to provide your own fronts and end panels, Buy Cabinets offer carcass only supply, these can be pre drilled to suit your hardware and panels.

Complete Cabinet

When you select an option including drawers or doors, you will be supplied with doors and drawer fronts. You still need to specify hardware which is sold separately.

Hardware

Choose from a range of pre-selected hardware options to suit each cabinet. When purchasing hardware from us, you get all other required components (i.e. drawer backs and sides), and by default, cabinets are fully assembled.

If you have a specific requirement, you can request a quote for custom hardware, or supply your own.

Choice of colours

The areas highlighted in green on the product diagrams can be finished in various colours, see colour chart overleaf.
